ADDITIONAL OPTIONS FOR COMMERCIAL SECTIONAL DOORS

Simple Install System - Wayne Dalton's track and hardware system provides for easy, one person installation. Components include: one-piece vertical lift track and simplified hardware.

Impact Section - Wayne Dalton's Impact Section is the perfect solution for doors exposed to damage from fork lifts and other warehouse traffic. Impact resistant composite skins surround an expanded polystyrene core. The Impact Section is adjustable to multiple door thicknesses.

*Wayne Dalton uses a calculated door section R-value and U-value for our insulated doors

The Wayne Dalton C-2400 Sectional Steel Door is designed and built to ensure an economical, low maintenance long life for moderate commercial use.

Available with a smooth or stucco-embossed finish in white or brown, the exterior of the C-2400 features a ribbed surface for increased strength and added visual appeal. The door's unique box-stile design, with a full, 2" thickness and 3" width, plus tongue-and-groove construction, adds vertical stability and strength. The stiles are bonded to the skin surface with high strength adhesive, resulting in the strongest possible unit.

MATERIALS AND CONSTRUCTION

Wayne Dalton's C-2400 Sectional Steel Doors feature pre-finished interior and exterior skins on nominal 24-gauge hot-dipped galvanized steel sections roll-formed for ultimate strength and durability. Fully-fitted 3" wide boxed stiles are adhered with adhesive, preventing rust and leakage associated with rivets

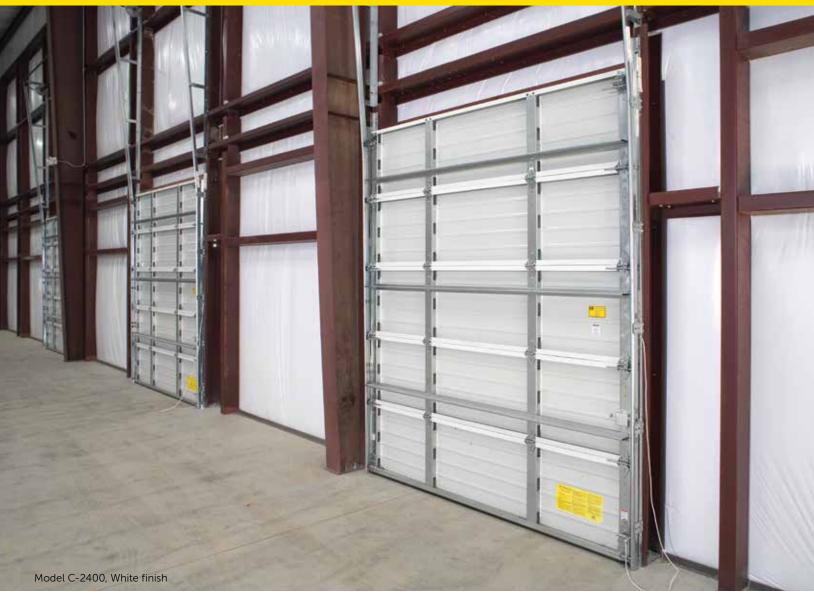

The standard bottom door seal, along with optional seals on the perimeter and between sections, greatly reduce air leakage, adding to the thermal efficiency of the building.

Additional options include insulation and weather stripping that provide a U-value of 0.13 and an R-value* of 7.64; factory-installed vision lites or aluminum full- view sections; electric operator; and special engineering to meet wind load requirements.
